Introduction to HTML

Discussion

1. What are the four tags required in every HTML page?

1) `<!DOCTYPE html>....` defines this document to be HTML5 and helps browsers to display web pages correctly.

2) `<html>` root element of an HTML page `</html>`

3) `<head>` contains meta information

`<title>`

specifies a title for the document

`</title>`

`</head>`

4) `<body>` contains the visible page content `</body>`

2. What is HTML emojis tags and write simple program to display some emojis

Emoji is characters from the UTF-8 alphabet, the element defines the character set. The characters A, B, and C, are displayed by the numbers 65, 66, and 67.
